

Mild Steel Swivel Elbow

An economical alternative to the 316 SS design, this swivel is manufactured from mild steel then electroless nickel plated or corrosion resistance. The standard configuration is female body and male shaft complete with nitrile seals, dust seals and Teflon backups. Designed to work at 275 Bar and available in BSPT.

Standard Configuration – Female Body and Male Shaft

Part Number	Pressure (bar)	Body	Thread	Size	Shaft	Thread	Size	Bush	RPM	Shaft	Body	Square	Hex
										L1 mm	L2 mm	L3 mm	L4 mm
